PEDRO SORRENTINO – **WEB DEVELOPER & IT SPECIALIST**

IT and technology have always been my passion, driving me to build a solid career in this field. Leveraging years of experience in IT systems and operations, I transitioned into web development, where I've designed, built, and launched both personal and client projects. I am proficient in modern stacks including React, Next.js, and Astro, focusing on creating fast, clean, and user-centric interfaces. For me, combining technical insight with a functional approach is the key to any well-crafted digital solution.

WORK EXPERIENCE

Freelance Web Developer

2014 – Present | Las Palmas, Spain

Key Contributions

- Developed end-to-end websites and applications using primarily React, Next.js, and Astro.
- Successfully delivered over 30 projects, including client work and self-developed projects (some of which were sold).

IT Operations Technician at UTE Alta Capacidad

2004 – 2024 | Las Palmas, Spain

Key Contributions

- Ensured the continuous operation of critical IT and electronic systems (control, safety) within tunnel infrastructure.
- Managed and efficiently resolved technical incidents, consistently ensuring system availability and safety.

Back-End Developer at AD Computers

2011 – 2012 | Madrid, Spain | Remote

Key Contributions

- Collaborated on development projects, building RESTful APIs with Node.js and MySQL.
- Maintained scalable, secure, and efficient services, supporting integration and optimization with front-end teams.

WordPress Developer at Publi Media 7

2004 – 2012 | Las Palmas, Spain

Key Contributions

- Created custom WordPress websites tailored to client needs.
- Developed custom themes and plugins for the WordPress ecosystem.
